

# Teamwork Project Assignment

## Teamwork and Personal Skills Course @ SoftUni

The goal of the assignment is to **enrich the Bulgarian Wikipedia with quality articles** on essential technical topics about **programming, software development, software engineering, IT**, etc. This is a community project and it will be beneficial for everyone.

The task of your team is to **write, edit and enrich new or currently small articles in Bulgarian** at <http://bg.wikipedia.org> by the rules and guidelines of Wikipedia.

### General Requirements

The article should be written at **high quality** and should contain objectively presented information. It should be authored text, written in encyclopedic style and **following the rules and guidelines of Wikipedia**:

- [The five pillars of Wikipedia](#) – what is Wikipedia and what are its fundamental principles
- [Rules for writing an article](#) – authored materials, non-commercial content, linking articles
- [Writing a better article](#) – how to write high-quality encyclopedic, objective, truthful and precise text
- [Editing content](#) – rules and guidelines for editing an article in Wikipedia
- [Wikipedia: Etiquette](#) – how to behave like authors and editors and how to communicate with others

### Deliverables

The topics will be distributed among the teams after the initial team creation. They will be on significant topics in a certain technology field. Depending on the current status of the topic you might need to create a new article or edit and enrich an existing one.

- At the end of the teamwork you should have a **finished article**, posted as part of [Wikipedia Bulgaria](#).
- Every team member should write on the article. This is visible from the chronology of the Wikipedia page ([example](#)).
- It is preferable to start a **sandbox article** for the initial stage of the writing process and then create the finished Wikipedia encyclopedic article. Sandbox article can be created by any of the members and then others can edit it ([example](#)).
- The teams **are allowed** to help each other, discuss the articles, suggest changes, check for mistakes and add information to the other articles of the other teams.

### Assessment Criteria

- **Quality** (encyclopedic style, grammatically correct, objective and understandable article) – 0...10
- **Authored Text** (the text should be unique or personally translated from free sources) – 0...10
- **Follow Wikipedia Rules** and positive feedback from Wikipedia community (lack of admin punishment on the article) – 0..10
- **Team work** (each team member contributed in 5 different days) – 0...10
- **Bonus** (help other teams in their contributions) – 0...10

## Public Project Defense

Each team will have to deliver a **public defense** of its work in front of the other students, trainers and assistants. Teams will have **only 10 minutes** for the following:

- **Demonstrate** the article (very shortly).
- Show the **sources** you used in gathering the information about the article.
- Explain how each team member have **contributed**.
- Optionally you might prepare a **presentation** (3-4 slides).

Please be **strict in timing**! Be **well prepared** for presenting maximum of your work for minimum time. Bring your own laptop. Test it preliminary with the multimedia projector. Open the project assets beforehand to save time. You have **10 minutes**, no more. Each team should have **at least one member** to defend the project.

## Give Feedback about Your Teammates

You will be invited to **provide feedback** about all your teammates, their attitude to this project, their technical skills, their team working skills, their contribution to the project, etc. The feedback is important part of the project evaluation so **take it seriously** and be honest.
